CARE FLOW

VACCINATED INDIVIDUALS

- **Positive covid test** = isolate ten days
- **Symptomatic negative covid test** = do not need to quarantine
- **Exposed to a positive covid individual** = do not need to quarantine but must pcr test 3-5 days post exposure

UNVACCINATED INDIVIDUALS

- **Positive covid test** = isolate ten days
- **Symptomatic negative covid test** = quarantine 14 days from onset of symptoms
- **Exposed to a positive covid individual** = quarantine 14 days post exposure
- **Mandatory rapid covid test three times per week**

We report weekly the number of students newly diagnosed as covid positive for the week on campus. This does not reflect the number of students currently in isolation as the isolation period lasts ten days.

Students diagnosed as covid positive are moved immediately to isolation housing on campus.

Exposed students requiring quarantine are moved to quarantine housing or may be approved for quarantine at home.

Any student experiencing any symptoms of viral illness should seek guidance from health services for direction and not attend class, activities or athletics until they have established a plan with nurse ryan.
